Re: Construction Permit BXPB-20141016ADN, Auxiliary / Backup Antenna for WBRU

The directional antenna system specified in the above-referenced construction permit was assembled and installed under my supervision by qualified personnel pursuant to the manufacturer's specifications.

Orientation and final alignment of the antenna were determined by the surveyor, whose attached statement confirms that the antenna alignment comports with the manufacturer's specifications.

Equipment tests were performed on November 29, 2015. The transmitter and antenna performed exactly as anticipated.

To the best of my knowledge and belief, the antenna installation comports with the Construction Permit in all respects.

Qualifications:

I have held FCC First Class and General Radiotelephone Operator Licenses since 1967.

I hold lifetime General Radiotelephone Operator License PG-4-10593, issued on January 2, 1985.
