INTERFERENCE CERTIFICATION

Applicant has utilized the latest version of Comstudy 2.2.12.56, an engineering software program (as modified by RadioSoft on March 1, 2004), to ascertain possible interference concerns. This program computes both contour and Longley-Rice interference. Having completed those computations, there was no interference found other than the following:

KJRH	(LIC)	0.3%
KDTN	(LIC)	0.4%
KDTN	(CP)	0.0%

These are within the Commission's established standards for permitted interference; therefore, this application may be removed from Auction No. 81, MX Group M-420. Consequently, this application may be granted.
