### CERTIFICATION

This is a certification that Gregory A. Shufan, P.L.S. performed a field survey on August 3, 2010, in Mifflin County, Pennsylvania. The survey was performed for Invisible Allies Ministries for radio station WRYV FM (facility number 172732) Milroy, Pennsylvania. The survey consisted of establishing the relative position of the existing tower through the use of field observations using Topcon Hiper Lite+ GPS receivers and a ground survey with respect to horizontal control points to determine geodetic north. Upon completion of our base line azimuth (drawing and data sheet attached), we aligned the SWR Model FMEC\2 HWS-PLUS-DA, Bay 1 and Bay 2, also known as WRYV FM Antenna. The orientation of the antenna is 295 degrees from geodetic north.

Several field and office checks were performed to verify instrument position and azimuth direction. All checks that were made verified the fieldwork was correct. Therefore I, Gregory A. Shufan, P.L.S., certify that the WRYV-FM antenna aligned on March 14, 2011 is in proper alignment, as specified.
