Notification of Reduced Power Operation and Request for Special Temporary Authorization

NCE Station WVIA-FM, Scranton, PA
Facility ID: 49436 / FRN: 0003263829

Pursuant to Sections 73.1560(d) and 73.1635 of the FCC's Rules, Northeastern Pennsylvania Educational Television Association ("NPETA"), licensee of noncommercial educational radio Station WVIA-FM, Scranton, Pennsylvania, notifies the FCC of the current reduced power operation of the station and respectfully requests Special Temporary Authorization ("STA") to permit the low power status for a period of six (6) months.

NPETA commenced operation of WVIA-FM at 75 % power on February 19, 2010. The reduced power operation was necessitated by a catastrophic equipment failure resulting from a fire that completely destroyed the station's transmitter building. On Friday, February 12, 2010, a major electrical fire broke out at the WVIA transmission site at Penobscot Mountain during maintenance work and destroyed the transmitter building, temporarily forcing WVIA-FM off-air. In addition, NPETA notifies the Commission that WVIA-FM's digital radio broadcasting has been temporarily forced off-air and suspended due to the equipment damage. Although has NPETA worked to restore analog radio broadcast service over WVIA-FM at a reduced power, it currently estimates that it may take several weeks, or possibly months, before facility repairs can be completed as needed to restore WVIA-FM's full power operation in a temporary structure.

Accordingly, NPETA requests STA for WVIA-FM's reduced power operation because it will be necessary to continue the low power status for more than thirty (30) days. A grant of STA will serve the public interest by allowing NPETA to maintain the station's existing noncommercial educational FM operation and programming for listeners in the station's local community until it can fully address the facility damage caused by circumstances beyond NPETA's control.

NPETA is a noncommercial educational licensee and it operates WVIA-FM on a noncommercial educational basis. Moreover, NPETA qualifies as a governmental entity. The licensee is therefore exempt from FCC filing fee requirements, pursuant to Section 1.1114 of the Commission's Rules, and the facility is exempt from FCC regulatory fees, pursuant to Section 1.1162 of the Rules.
