

SAINTE PARTNERS II, L.P.  
TL (New) - Redding, CA

EXHIBIT 6A  
Engineering Statement

In order to provide a service to Redding, California, and the surrounding areas, it is now proposed to establish a new Low Power television station at South Fork Mountain, near Redding.

The attached allocations study, Exhibit 6B, (please note that the first entry is that of the applicant) indicates that interference is predicted with regard to various authorizations. In this instance, application of O.E.T. Bulletin No. 69 procedures shows that population loss to any of these would not exceed 0.5% and appropriate waivers are requested for each.
