

TECHNICAL STATEMENT
RADIO MULTIPLE OWNERSHIP ANALYSIS

NRC BROADCASTING, INC.

This radio multiple ownership analysis was prepared on behalf of NRC Broadcasting, Inc. The following stations are considered under proposed ownership or control:

Call Sign / Facility ID	Location	Facilities
KSMT(FM)/57336	Breckenridge, CO	Channel 272A 3 kW -70 m
KIDN-FM/57339	Hayden, CO	Channel 240C3 1.8 kW 360 m
KIDN-FM/57339 CP	Hayden, CO	Channel 240C3 6 kW 198 m
KKCH(FM)/4360	Glenwood, CO	Channel 224C 56 kW 763 m
KSKE-FM/16269	Vail, CO	Channel 284C1 100 kW 102 m
KTUN(FM)/44012	Eagle, CO	Channel 268C 37 kW 671 m
KTUN(FM)/44012 APP.	Eagle, CO	Channel 269C1 11.8 kW (Max-DA) 674 m
KNFO(FM)/8780	Basalt, CO	Channel 291A 1.6 kW 111 m
KRMR(FM)/84270	Hayden, CO	Channel 297C2 29 kW 198 m
KSPN-FM/43884	Aspen, CO	Channel 276A 3 kW -26 m
KFMU-FM/34434	Oak Creek, CO	Channel 281C3 1.4 kW 327 m

The principal community contours of all of these stations are depicted on a map included herein as Figure 1. Since most of these stations have overlapping principal community contours (3.16 mV/m for FM stations), an ownership study was prepared in accordance with the Federal Communications Commission multiple ownership rules as outlined in Section 73.3555.

Radio Markets

The “radio markets” applicable to common ownership of the subject stations are defined as the areas encompassed by the mutually overlapping principal

community contours of the stations proposed to be commonly owned.* There are five “radio markets” defined for analysis under the Commission’s Rules. The table below lists the defined markets:

Defined Radio Market	Stations that Define Radio Market	
	AM Stations	FM Stations
Market 1	--	KRMR(FM), KIDN-FM (Licensed or Authorized CP), KFMU(FM)
Market 2	--	KFMU(FM), KTUN(FM) (Licensed or Application)
Market 3	--	KKCH(FM), KTUN(FM) (Licensed or Application), KNFO(FM), KSPN-FM
Market 4	--	KKCH(FM), KTUN(FM) (Licensed or Application), KSKE-FM, KSPN-FM
Market 5	--	KTUN(FM), KSMT(FM), KSKE-FM

Count of Stations in Defined Markets

The number of other radio stations in a “radio market” is determined by counting the operating stations having principal community contours that intersect the principal community contours which define the radio market. Only those stations located within 92 kilometers of the perimeter of the mutual overlap area of the respective defined market area were employed in the count of the stations. The results of the analysis are tabulated below:

Defined Radio Market	Number of Stations in Radio Market
Market 1	1 AM, 3 FM; 4 Total
Market 2	3 AM, 9 FM; 12 Total
Market 3	9 AM, 18 FM; Total 27
Market 4	9 AM, 18 FM; Total 27
Market 5	2 AM, 8 FM; Total 10

* See Order in Implementation of Section 202(a) and 202(b)(1) of the Telecommunications Act of 1996 (Broadcast Radio Ownership) FCC 96-90, released March 8, 1996 and Memorandum Opinion and Order in Revision of Radio Rules and Policies 7 FCC Rcd 6387, 6395 para. 39 (1992).

Figures 2 thru 6 are tabulations of the radio stations identified in the defined radio markets tabulated above. Only known licensed, operating stations were employed for the study. Distances to the AM coverage contours were predicted using the antenna patterns as identified in the Commission's AM database and the appropriate Ground Wave Field Strength versus Distance Graph of 47 CFR 73.184. Ground conductivity data were obtained from FCC Figure M3. Distances to the FM contours were determined based on the method of 47 CFR 73.313. Terrain data was derived from the N.G.D.C. 30-second computer database for each of the FM stations using radials evenly-spaced every 10 degrees of azimuth.

Based on the above, it is concluded that the proposed combination of the stations to be owned complies with Section 73.3555(a) of the FCC Rules.
