Request for Extension of Reduced Power DTV STA

NCE Station WNSC-DT, Rock Hill, SC (F.I.N. 61009)

South Carolina Educational Television Commission ("SCETV"), pursuant to Section 73.1635 of the Commission's rules, hereby requests an extension of Special Temporary Authority ("STA") to continue reduced power operation of DTV facilities for noncommercial educational television Station WNSC-TV/-DT, Rock Hill, South Carolina.

The FCC granted SCETV's initial request for reduced power STA for WNSC-DT on May 18, 2004 (*see* FCC File No. BDSTA-20040414ADK, enclosed). The STA was most recently extended on June 8, 2005 (*see* FCC File No. BEDSTA-20050426ADS), and is currently due to expire on November 24, 2005. Pursuant to Paragraphs 34-36 of the *Memorandum Opinion and Order on Reconsideration* in MM Docket No. 00-39, FCC 01-330 (rel. Nov. 15, 2001), SCETV requests a six-month extension of this STA. SCETV proposes no technical changes to its STA operation as outlined in the initial request and granted by the Commission. The STA specifies an ERP of 17.6 kW, a height of radiation center of ground level of 122 meters and geographical coordinates of 34-50-23 N; 81-1-6 W.

Grant of this request would serve the public interest because it would allow SCETV to maintain its existing digital television broadcasting of its noncommercial educational programming over Station WNSC-DT in the Rock Hill area until it can certify completion of the station's full power DTV facilities. SCETV holds a modified construction permit in FCC File No. BMPEDT-20041012AJB for the permanent full power WNSC-DT facility, and plans to complete its construction shortly, following installation of a new dual digital/analog antenna (as also authorized by FCC File No. BPET-20041012AJA). However, until such time as SCETV is able to complete the antenna installation and licensing of the modified WNSC-DT facility, the STA will be necessary to authorize continued operation of the station's digital facility.
