**TECHNICAL STATEMENT**

This Technical Statement was prepared on behalf of Central Florida Educational Foundation, Inc. ("CFEF"), licensee of FM translator station W241BL, Channel 241D, Mount Dora, Florida. CFEF has a construction permit for W241BL to reduce the power of the facility and change to Channel 239D at the existing W241BL site (BPFT-20111107AMQ). As a result of the channel change, the call sign of the translator becomes W239BU, which will be used throughout this application. Exhibit A is a calculation of the transmitter power output for FM translator W239BU.

There are two special operating conditions/restrictions listed on the W239BU permit. The first condition states that an application for license, FCC Form 350, must be on file prior to commencing program tests with the facilities authorized in the permit. The submission of this instant application satisfies the condition.

The second condition states that CFEF will reduce the power of W239BU or cease operation to insure persons with access to the site are not exposed to radio frequency radiation levels above the limits. CFEF states that it will, in cooperation with other tower users, reduce the

power of W239BU or cease operation, as necessary, to insure that persons having access to the tower will not be exposed to radio frequency electromagnetic fields in excess of the FCC's guidelines.

Based on the foregoing, it is believed that all conditions have been satisfied and W239BU has been constructed in compliance with the Commission's rules.
