

Zero Population Interference Exhibit- Second Adjacent Waiver

The Following:

Proposed facility is on channel 288, second adjacent to WOJO EVANSTON IL 286B and WCFS-FM ELMWOOD PARK IL 290B. At proposed location, WOJO has a signal strength of 95.1 dBu and WCFS-FM has a signal strength of 97.7 dBu, resulting in an interference overlap of 12m and 9 m using U/D method. Antenna is located 30 meters above ground, thus non-population is interfered with.
