SUBJECT: McHENRY TOWER

To Whom It May Concern:

At the request of Mr. Dave Melton, Coast Radio Group, I was asked to check the alignment of the WZNF antenna of a radio tower located in Section 26, Township 3 South, Range 11 West, McHenry, Stone County, Mississippi. Said tower also being located at Latitude 30-45'05.7" and Longitude 89-03'24.2".

Using a Topcon GTS-201D total station having an accuracy of 1 second and using standard survey methods determined the dish to be set at an azimuth of 180 degrees, within a tolerance of 0.4 degrees. Azimuth was determined by solar observation.

My personal qualifications are that I have worked in the survey field for 31+ years and am a licensed Professional Land Surveyor in three states, Mississippi, Alabama, and Florida.

Respectfully,

Gary A. Durbin, Professional Land Surveyor 2401
