

## **Exhibit 2**

By this application, New Northwest Broadcasters, LLC (“NNB”) requests program test authority and a license to cover modifications to KXDD(FM)’s existing licensed facilities. In connection with its construction of the modified facilities and upon replacement of the station’s antenna (*see* FCC File No. BPH-20010427AAR), on February 23, 2002, the station began operating at one half of the authorized effective radiated power with its new antenna. *See* 47 C.F.R. § 73.1615(a).

NNB inadvertently failed to notify the FCC pursuant to 47 C.F.R. § 73.1615(c). NNB respectfully requests that the Commission consider this application to constitute the requisite notification.
