

EXHIBIT J- Summary

After conducting the required Partial Proof of Performance on AM Station KIQQ, Barstow, California, it is my firm belief that there have been no changes to the existing parameters or directional pattern of this station after the construction of K220IF by Educational Media Foundation.

I certify that good engineering practices were followed in the preparation of this examination and that the necessary test equipment has a current and valid calibration.

No corrective action is required for AM station KIQQ by the Licensee of K220IF.

Harold S. "Steve" Vogt
Project Engineer
