RE: KXDD Transmitter Antenna Orientation

Dear Mr. Hopseker and Interested Parties:

I hereby certify by this letter that the KXDD Transmitter Site, located in the vicinity of Rattlesnake Hills, southeasterly of Yakima, Washington, is orientated such that the antenna bays bear 20 degrees east of True North.

Antenna orientation was derived from GPS observations on February 25, 2002, and visual inspection of the installed antenna bays.

This orientation is based upon orientation information supplied to me from the Shively Labs.

Sincerely,

ESM CONSULTING ENGINEERS, LLC.

Rick A. Foxworthy, P.L.S.
Senior Survey Project Manager
