**NEW FM TRANSLATOR STATION**  
**CH 237D - 95.3 MHZ - 0.20 KW**  
**NAMPA, IDAHO**  
**April 2018**

**TECHNICAL STATEMENT**

This Technical Statement and attached exhibits were prepared on behalf of Radio License Holding CBC, LLC ("RLH"), an applicant for a new FM translator station on Channel 237D at Nampa, Idaho (FAC ID 202737). RLH is herein submitting the long form construction permit application for the "Tech Box" application (BNPFT-20180130AFY) for this facility, pursuant to Public Notice DA 18-256, released March 15, 2018.

The proposed new FM translator's antenna is to be located on an existing structure which is registered with the FCC and assigned Antenna Structure Registration Number 1043188. Since no changes are proposed for the tower, the FAA has not been notified of this proposal.

RLH proposes to rebroadcast the signal of AM station KTIK, 1350 kHz, Nampa, Idaho on the proposed new facility. The proposed new translators's 60 dBu contour is within 25.0 miles (40.0 kilometers) of the KTIK site; therefore, the new translator is considered a fill-in translator. Exhibit A is a map demonstrating compliance with the fill-in requirements.

Exhibit B is a study demonstrating that the proposed new translator will not cause interference to any full service station, nor will interference be delivered to any existing FM translator or LPFM application.

Due to the co-location of the proposed new translator's antenna with an AM station, the worksheets associated with FCC Form 349 could not be used to demonstrate compliance with the Commission's human exposure guidelines for radio frequency radiation. Exhibit C documents compliance with the radio frequency radiation guidelines.

All other necessary documentation used to certify the technical portion of FCC Form 349 has been forwarded to RLH and is available to the Commission upon request.<sup>1</sup>

---

1) The undersigned has evaluated only the radio frequency radiation exposure portion of the environmental review. All data regarding broadcast facilities was extracted from the Commission's CDBS database on the date of this application. We assume no liability for errors or omissions in that database which may be adverse to the request contained herein.
