

APPLICATION FOR STATION LICENSE
F.T.G. BROADCASTING, INC.
WWEL (FM) RADIO STATION
CH 280A - 103.9 MHZ - 2.55 KW
LONDON, KENTUCKY
October 2002

TECHNICAL STATEMENT

This Technical Statement was prepared on behalf of F.T.G. Broadcasting, Inc. ("FTG"), licensee of radio station WWEL, Channel 280A, London, Kentucky. FTG also holds an outstanding construction permit authorizing minor changes in the facilities of WWEL (BPH-20020222AAP). This instant application seeks a license to cover the permit. Attached as Exhibit A is a calculation of the transmitter output power for WWEL.

The WWEL permit has two conditions listed on the permit. The first condition states that the power of co-located AM station WFTG would be determined by the indirect method during the construction process and, further, that an application to return to direct measurement of power be submitted to the Commission, along with the license application for WWEL. It is noted that WFTG also had an outstanding permit, which has been implemented, and an application for station license for WFTG has been submitted to the Commission. The remaining condition relates to the reduction of the power of the WWEL antenna system to ensure that persons having access to the site will not be exposed to radio frequency radiation levels in excess of the rules. FTG herein restates that it will reduce power, as necessary, to ensure persons with access to the tower and site will not be exposed to levels in excess of the rules. Based on the foregoing, all conditions have been met.
