

**KPVU Prairie View, Texas**

**Installer Certification in Support of Application for License to cover Construction  
Permit**

**And Test Request for Program Test Authority**

I, David L. Cassels, certify under penalty of perjury, that I am the broadcast engineer to KPVU-FM and have been a professional broadcast engineer for 31 years. I have been involved with over 15 previous installations of directional FM transmit antennas. I also certify that the following statements are valid and true to best of my knowledge.

I, David L. Cassels, personally supervised the assembly and mounting of a Dielectric type DCRM3 directional FM transmit antenna for KPVU in Prairie View, Texas on July 17, 2009 under FCC Permit File Number BPED-20060711AAP.

I supervised the antenna installer and antenna tuner in locating and positioning of all parasitic elements and made certain that they were installed correctly, in accordance with Dielectric documentation. In addition, I also verified that the entire antenna system was assembled correctly and that the three antenna bays and all parasitic elements were installed correctly on the supporting tower structure pursuant to the antenna manufacture's documentation.

David L. Cassels
