**HARRIETTA, MICHIGAN**  
**April 2002**

**TECHNICAL STATEMENT**

\_\_\_\_\_This Technical Statement and attached exhibits were prepared on behalf of Donald James Noordyk ("Noordyk"), permittee of FM radio station WKAD, Channel 229A, Harrietta, Michigan. Noordyk herein proposes to amend his pending modification application, BMPH-20011024AAR. This amendment is needed to slightly lower the proposed height above average terrain due to the reduction of tower height. The reduction in tower height was required by the Federal Aviation Administration in order to receive a Determination of No Hazard for the structure. The slight adjustment in the site coordinates is due to a survey of the proposed transmitter site. The power of the relocated WKAD is also increased to maintain a maximum 6.0 kilowatt equivalent Class A station.<sup>1</sup>

Since Noordyk is proposing a new tower structure for WKAD, the Federal Aviation Administration has been apprised of this proposal and has issued a Determination of No Hazard. The proposed tower has been registered with the Commission and assigned tower registration number 1233347. All information required for FCC Form 301, Section III-B, is attached. The documentation used to certify the information on the technical portion of Form 301 has been forwarded to the applicant and is available to the Commission upon request.

---

1) An application to transfer WKAD to Cadillac Broadcasting, LLC, has been submitted to the Commission, along with a Radio Ownership compliance analysis. The amended WKAD site, due to its de minimus changes, does not affect the market study, nor change the definition of the previously outlined radio market. As such, an amended market study is not necessary.
