Engineering Statement
in support of an
Flash Cut Application for BLTTA-20040805ABM
Channel 28, Chico, CA
Family Stations, Inc.

BACKGROUND

Applicant has a licensed, class A LPTV station, KKPM-CA in Chico, CA. Family Stations is applying for a digital flash cut on channel 28, the current broadcast channel. With the exception of the modulation type and the ERP reduction, all other parameters remain the same.

INTERFERENCE CONSIDERATIONS

Potential interference to other stations was studied using "Population Loss Studies" based on the "Longley-Rice Terrain Algorithm" in accordance with OET Bulletin 69.¹ Population loss for each station is less than 0.5% for full-service and Class A TV stations and less than 2% for LPTV and translator stations. Cell size for service analysis is 1.0 km/side. The distance increments for Longley-Rice Analysis is 1.0 km. Any discrepancies are noted below.
