

EXHIBIT 12

This narrative exhibit is submitted to demonstrate that the instant proposal fully complies with the interference criteria set forth in Section 74.1204 of the Commission's rules.

Attached at exhibit 13 are a spacing study and maps demonstrating clearly that there is no prohibited overlap between this proposal and any other FM services. The attached FM spacing study demonstrates that this proposal would be fully spaced even as a full power Class A FM station to all but four other FM facilities. The attached maps demonstrate that there is no prohibited contour overlap between these four facilities and the instant proposed FM translator facilities. As demonstrated in these maps no prohibited overlap with these stations is predicted.

The four facilities that have been included on the attached maps are: WBHT, 97.1, Mountain Top, PA (60 dBu contour to proposed 40 dBu interference contour); WZKN, 96.9, Ridgebury, PA (60 dBu contour to proposed 54 dBu interference contour); WPEL-FM, 96.5, Montrose, PA (54 dBu contour to prop. 94 dBu int. contour); and WYXL, 97.3, Ithaca, NY (54 dBu contour to proposed 48 dBu interference contour).

W299BM 97.1 Dushore, PA 74.1204(d) Narrative and its related exhibits are included to show allowable overlap under Section 74.1204(d) with this proposal's 94 dBu interference contour and the 54 dBu coverage contour of WPEL-FM, Montrose, PA. A scale of kilometers has been included on the maps. These maps were drawn to scale using the rfSoftware series of computer programs.
