Interference Exhibit

This application is inside the protected contour of KSNF, channel 46. However, an interference analysis using the Longley-Rice Terrain Dependent Algorithm in accordance with OET Bul 69 shows the population loss to be less than 0.5%.

Non-ionizing Radiation Exhibit

The non-ionizing radiation at 2 meters above ground in the vicinity of the tower is less than 5% of the general public exposure limit. Accordingly no special precautions are necessary.
