

KVMX (FM)
Exhibit 9
Special Conditions

Special Condition #5 requires that AM Station KCMD be notified prior to construction and that a partial proof of performance be performed before and after construction.

This project changes the class of KVMX from C1 to CO. The only construction involved replacing the existing transmitter with a transmitter capable of higher power. The antenna and transmission line that were originally installed in 1997 were not changed or modified.

Therefore the applicant, who is also the licensee of KCMD (AM), was not able to do the measurements specified.
