Directional Antenna Installation Affidavit

Stations: KOAS-FM; KVGS-FM

Frequencies: 105.7Mhz; 107.9Mhz

Channels: 289; 300

Facility IDs: 132721; 132722

Directional Antenna – ERI Model MP-2E-DA-HW-SP

Sirs:

On August 3, 2009 I inspected the Directional FM antenna installation for the above stations and found it to be pursuant with the manufacture's instructions and installation drawings. The antenna system is presently being used by FM booster stations KOAS-FM1 and KVGS-FM1, but will also serve as auxiliary antenna systems for KOAS and KVGS, with no change to the installed systems.

I have over 30 years of broadcasting experience and my qualifications are a matter of record before the Federal Communications Commission

Raymond A. Fodge Jr.
