

EXHIBIT 5
MULTIPLE OWNERSHIP

The instant application, proposes a minor modification (“Proposed Change”) to the facilities of station WEPN(AM), New York, NY (Fac. ID 65636) (the “Station”), licensed to New York AM Radio, LLC (“Licensee”). The Station is “home” to, and its community of license is within, the New York, New York metropolitan area (“New York Metro”). Entities with an attributable interest in Licensee (collectively, the “Applicants”) presently have an attributable interest in four radio stations in the New York Metro and one television station in the New York, NY designated market area (“New York DMA”). This exhibit demonstrates that the Proposed Change is consistent with the Commission’s local radio and radio/television cross ownership limits.

Local Radio Ownership

Applicants hold a direct or indirect attributable interest in the following four radio stations that are “home” to the New York Metro:

Callsign	SVC	Market	Fac ID	City of License	ST
WABC	AM	New York, NY	70658	New York	NY
WPLJ	FM	New York, NY	73887	New York	NY
WEPN	AM	New York, NY	65636	New York	NY
WQEW	AM	New York, NY	29024	New York	NY

The Applicants have applications pending to transfer control of WABC(AM) and WPLJ(FM) to a third party; however, for purposes of this Application, the Applicants have included these stations in the multiple ownership analysis. *See* BTC-20060228AKZ; BTC-20060228ALC. According to the BIA database, there are forty-nine (49) full-power commercial radio stations licensed in the New York Metro. *See* Figure A. In a market of this size, a party may have an attributable interest in up to eight (8) full-power commercial radio stations, not more than five (5) of which may be in the same service. The Applicants hold an attributable interest in one (1) FM and three (3) AM full-power commercial radio stations in the New York Metro. Thus, the Proposed Change complies with the local radio ownership limits set forth in Section 73.3555(a).

Cross-Ownership

The Applicants hold a direct or indirect attributable interest in one (1) full-power television station in close geographic proximity to the Station: WABC-TV, Fac. ID 1328, licensed to New York, NY and assigned to the New York DMA. Because the Grade A contour of WABC-TV encompasses New York, the community of license of the Station, and because the Station’s 2 mV/m contour will continue to encompass the entire community of New York, the community of license of WABC-TV, the Commission’s radio/television cross-ownership rule is

triggered by the Application. *See* Figure 1. In addition, the Grade A Contour of WABC-TV also encompasses the community of license of the following commonly-attributed radio stations: WQEW(AM), WABC(AM), WPLJ(FM), and WEPN(AM). *See* Figure 1. The relevant contours of all of these same stations also encompass New York, the community of license of WABC-TV. *See* Figure 1. No other station in which the Applicants hold an attributable interest has a contour overlap with these TV or radio stations. *See* Figure 2 (showing contours of WDDY(AM), WMKI(AM), WDDZ(AM), and WWJZ(AM)). Further, none of the Applicants holds an attributable interest in any newspaper in or near the greater New York area. Thus, the Proposed Change would result in the common attribution of one (1) television station and four (4) radio stations in the relevant market.

Pursuant to Section 73.3555(c) of the Commission's rules, an entity may own an attributable interest in one (1) commercial television station and up to six (6) commercial radio stations in the same market if at least twenty (20) independently owned media voices would remain in the market. For purposes of determining the number of media voices in a market, a party may include independently owned and operating: (i) television stations in the DMA of the subject television station; (ii) radio stations in the Arbitron radio market of the subject television station; (iii) radio stations in the Arbitron radio market of the subject radio station(s); (iv) certain daily newspapers; and (v) a cable system, if applicable. Figure B sets forth the number of independently owned radio and television voices in the subject market, including: (i) radio stations in the New York Metro (the home market of the Station and WABC-TV); and (ii) television stations in the New York DMA.¹ Figure B demonstrates that this voice count totals fifty-five (55) voices, according to the BIA database. Because this number exceeds twenty (20), common ownership of one (1) television station and four (4) radio stations is permissible under the Commission's radio-television cross ownership rule. Thus, the Proposed Change will fully comply with Commission's cross-ownership rules, as set forth in Section 73.3555(c).

Certification

Based on the foregoing, Applicants hereby certify that the Proposed Change fully complies with the multiple ownership restrictions set forth in Section 73.3555 of the Commission's rules.

¹ Because the number of independent radio and television voices greatly exceeds twenty, the number of other independent media voices (e.g., newspapers and cable systems) was not necessary to calculate.
