NATURE OF THE PROPOSAL
prepared for
Nassau Broadcasting III, LLC
WFNK(FM) Lewiston, Maine
Facility ID 65675
Ch. 298C1 15.5 kW (MAX-DA) 576.2 m

Nassau Broadcasting III, L.L.C. ("Nassau"), licensee of FM radio station WFNK(FM) (Ch. 298C1, Lewiston, ME), herein proposes to construct a new auxiliary facility for WFNK.

WFNK is presently licensed (file number BLH-20050310AAL) to operate with an effective radiated power ("ERP") of 100 kW at a height above average terrain ("HAAT") of 283 meters. The proposed auxiliary antenna will be side-mounted on an existing tower structure (FCC ASR Number 1045602) located 32.4 km from the main WFNK site. The proposed auxiliary antenna will operate at 15.5 kW ERP using a directional FM antenna at a HAAT of 576.2 meters.

Exhibit 22 - Figure 1 shows that the 60 dB μ (1 mV/m) contour of the proposed auxiliary facility does not extend beyond the 60 dB μ contour of the main facility, in compliance with §73.1675(a)(1). Because minimum distance spacing and contour protection rules do not apply to auxiliary facilities, the instant proposal is believed to comply with all pertinent FCC allocations requirements.

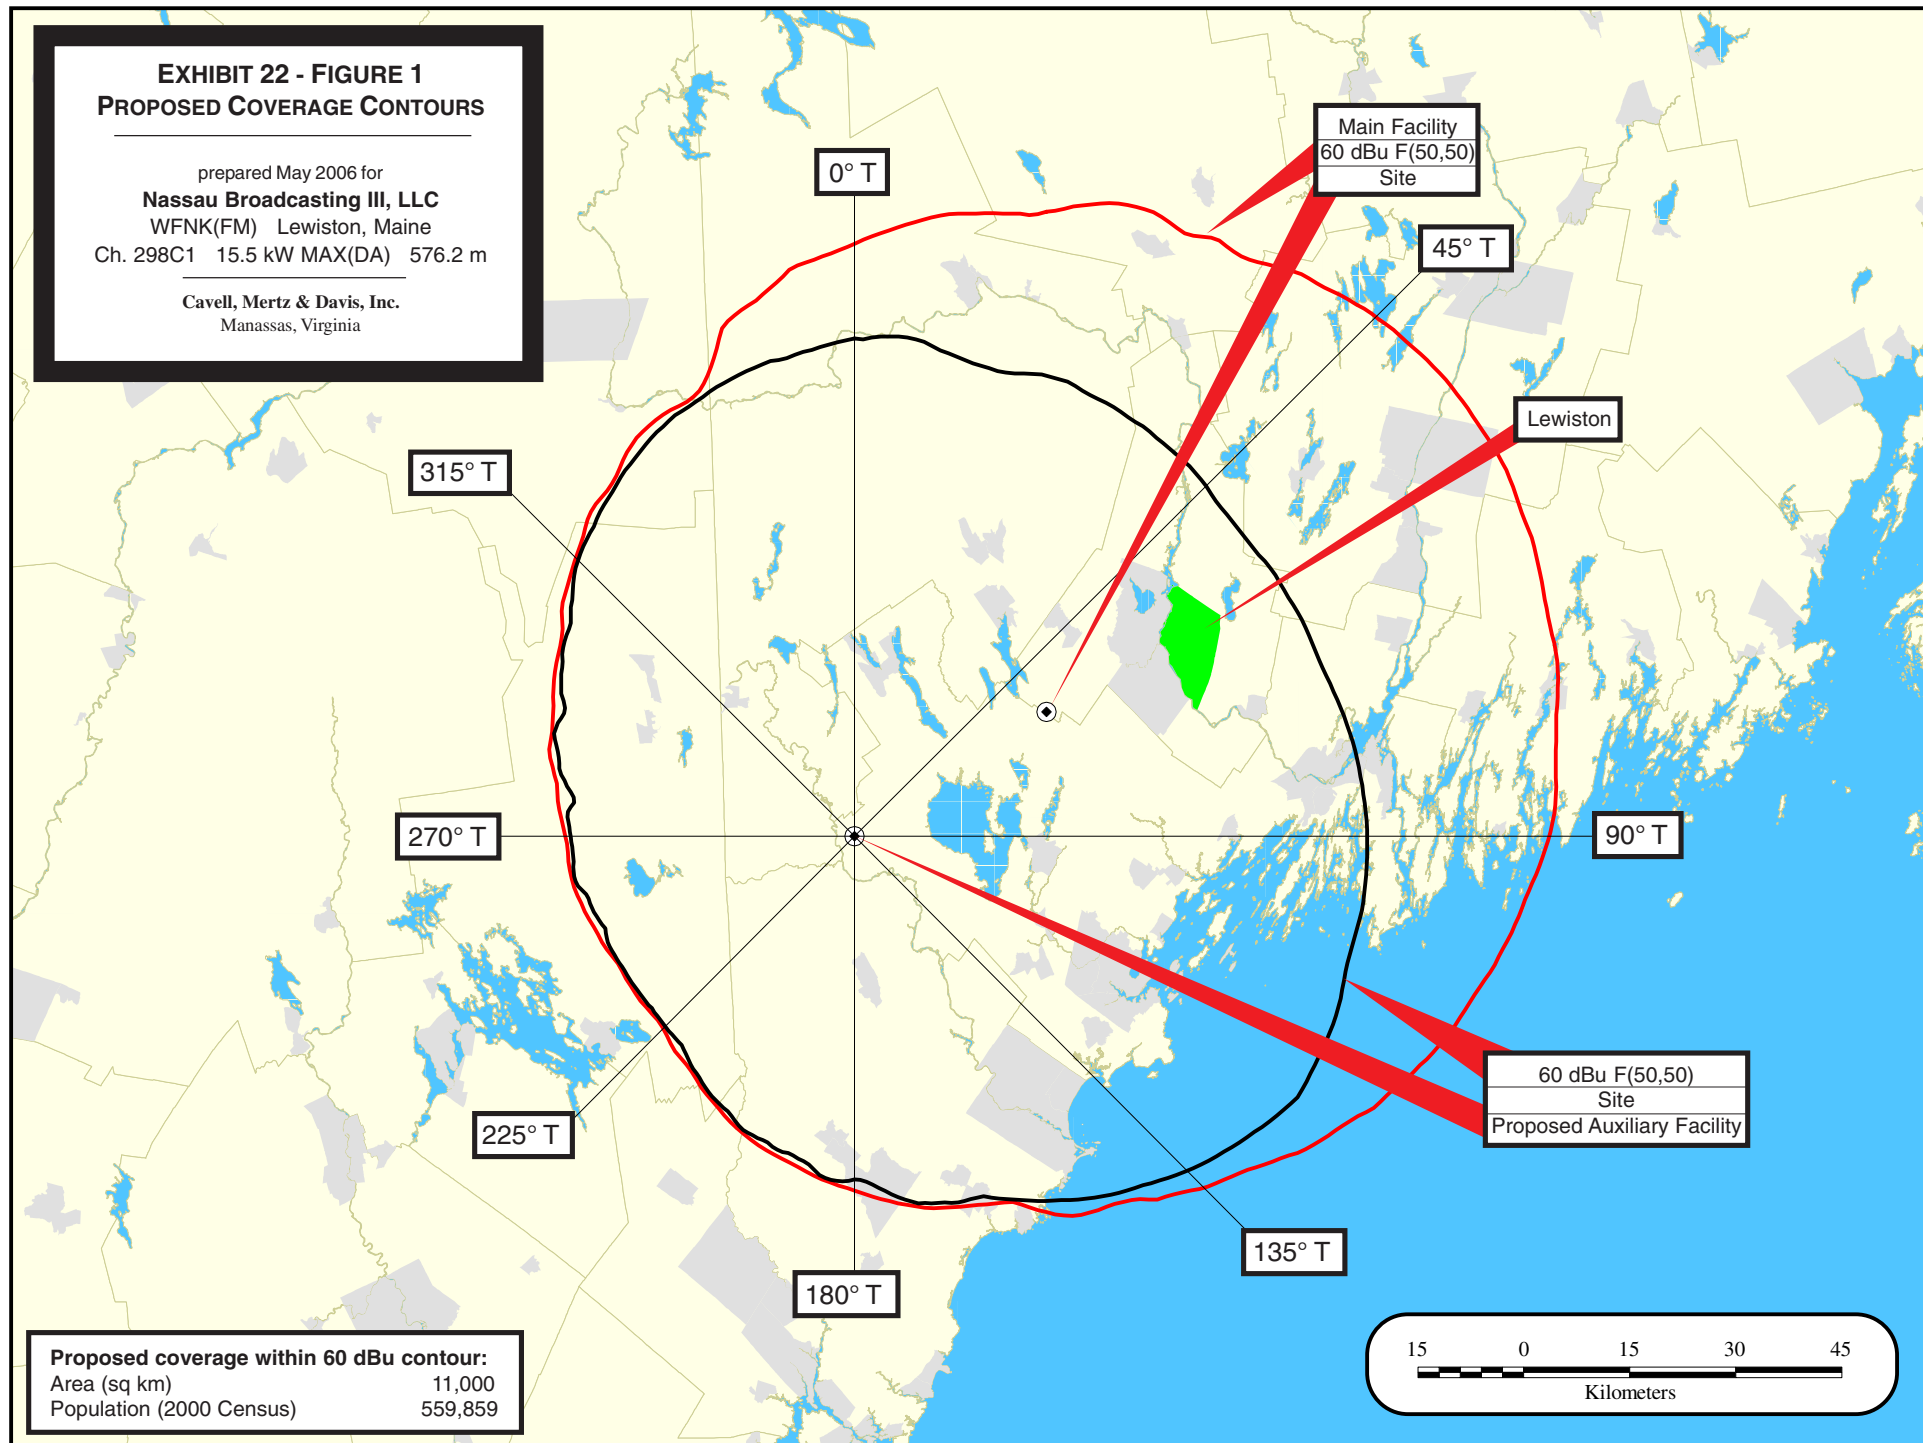

Based on data extracted from the FCC's CDBS database, there are no authorized AM or FM stations within 3.2 km of the proposed facility. With the exception of station WMTW-TV, Poland Spring, ME (BLCT-20020211AAX and BLCDT-20050607ADJ), which operates from the referenced tower structure, there are no authorized TV facilities within 3.2 km of the proposed facility. The nearest FCC monitoring station is at Belfast, Maine at a distance of 150 km from the proposed site. The proposed site exceeds by a great margin the minimum distance specified in §73.1030(c)(3)(iii) that would suggest consideration of the monitoring station.

It is thus believed that the facility proposed herein will satisfy all of the pertinent Commission Rules and Policies now in effect regarding allocation matters for an auxiliary facility.
