

MINOR CHANGE APPLICATION
KNTO, INC.
KNTO (FM) RADIO STATION
CH 227A - 93.3 MHZ - 4.6 KW
CHOWCHILLA, CALIFORNIA
October 2003

TECHNICAL STATEMENT

This Technical Statement and attached exhibits were prepared on behalf of KNTO, Inc. ("KI"), licensee of KNTO, Channel 227A, Chowchilla, California. KI herein proposes to make minor changes in the facilities of KNTO by relocating the station, increasing the antenna height above average terrain and increasing the station's effective radiated power. No other changes are proposed.

KI proposes to locate the antenna system for KNTO on a new tower. As such, the Federal Aviation Administration was appraised of this proposal. Once the FAA determination for the proposed structure become final, the tower will be registered with the FCC. Using the Commission's contour propagation curves, the 70 dBu contour of the proposed KNTO from the requested site does not encompass all of Chowchilla. However, using an alternate propagation model, the community of Chowchilla does receive the requisite city grade coverage. See Exhibit A for details. All other necessary documentation used to certify the technical portion of FCC Form 301 has been forwarded to the KI and is available to the Commission upon request.
