

**ENGINEERING STATEMENT OF JAMES D. SADLER
IN SUPPORT OF A REQUEST FOR
SPECIAL TEMPORARY AUTHORITY
STATION KRDY - SAN ANTONIO, TEXAS
1160 kHz – 10 kW-D, 1 kW-N, U, DA-2
Facility ID: 26310**

Licensee: Salem Communications Holding Corporation

I am a Technical Consultant, an employee in the firm of Carl T. Jones Corporation, with offices located in Springfield, Virginia. My education and experience are a matter of record with the Federal Communications Commission.

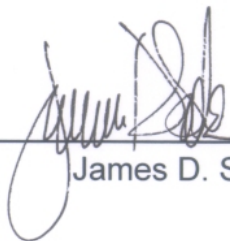

This office has been authorized by Salem Communications Holding Corporation (herein "Salem"), licensee of AM Broadcast Station KRDY, San Antonio, Texas, to prepare this engineering statement in support of a request for Special Temporary Authority (STA). Station KRDY is licensed for operation on 1160 kilohertz with power of 10 kilowatts during daytime hours and 1 kilowatt during nighttime hours employing different directional antenna patterns during day and night (DA-2).

The daytime directional antenna pattern has been adjusted by the undersigned to restore the pattern to its authorized condition. Partial proof of performance field strength measurements have been completed and show that the two daytime monitored radials are within the authorized standard pattern values. An Application for Direct Measurement of Power, FCC Form 302-AM, is being prepared to establish new licensed parameters. It is respectfully requested that Special Temporary Authority be granted to allow Salem to operate Station KRDY

with daytime parameters at variance pending the issuance of a new license. No changes have been made to the nighttime directional antenna which remains operating with the licensed parameters.

This statement was prepared by the undersigned and the information contained herein is believed to be true and correct.

DATED: June 19, 2018

James D. Sadler
