

5/27/2008

This instant application proposes a new translator station, the transmitting antenna of which is to be mounted on an existing water tank with a height (tank only) of 48.8 m. above ground level. This application proposes to use an antenna structure (mast) that will extend above the top of the tank 3.1-meters (10 feet.) There are existing antennas on this water tank, however, none of them exceed 6.1 meters. Pursuant to C.F.R. 47, § 17.14 (b) because the antenna structure to be mounted on top of this water tank is less than 6.1 meters in height, this proposal is exempt from FAA notification and as such, pursuant to § 17.4 (a), this proposed antenna structure is not required to be registered with the FCC. Below are the TOWAIR determination results of our proposal.

DETERMINATION Results

Structure does not require registration. The structure meets the 6.10-meter (20-foot) Rule criteria.
