

TECHNICAL STATEMENT
RADIO MULTIPLE OWNERSHIP ANALYSIS
CAPSTAR TX LIMITED PARTNERSHIP

This statement and the attached figures were prepared on behalf of Capstar TX Limited Partnership ("Capstar"), a licensee subsidiary of Clear Channel Communications, Inc. Capstar proposes to modify the facilities of WRDU(FM). A multiple ownership analysis was prepared considering the following radio stations under present or proposed common ownership or time brokerage:

Table 1: Proposed Commonly Owned or Controlled Stations Studied

Call Sign	City	State	Freq	Status
WRDU(FM)	Wilson	NC	106.1	APP ¹
WDCG(FM)	Durham	NC	105.1	LIC ²
WTRG(FM)	Rocky Mount	NC	100.7	LIC
WRSN(FM)	Burlington	NC	93.9	LIC
WDUR(AM)	Durham	NC	1490	LIC

Since certain of these stations have overlapping principal community contours (5 mV/m for AM stations, 3.16 mV/m for FM stations), an ownership study has been prepared in accordance with the Federal Communications Commission's multiple ownership rules³.

Capstar does not have an attributable interest in any other station with a principal community contour that overlaps or intersects the proposed facility of WRDU(FM)⁴.

Radio Markets

The "radio market" applicable to common ownership of the subject stations is defined as the area encompassed by the mutually overlapping principal community contours of the proposed commonly owned stations. These mutually

¹ This instant application.

² Station WDCG(FM) has recently submitted application BPH-20020808AAB. Licensing of the proposed facilities for WDCG(FM) would not introduce new radio markets and would not affect the definition of Radio Market "1". It would, however, decrease the total count of stations in the market by 2 FMs and 6 AMs. Such a change would not affect the validity of this multiple ownership analysis.

³ See 47 C.F.R. § 73.3555.

⁴ Station WVBZ(FM) has recently been granted permit BPH-20011009AAL. Licensing of the proposed facilities for WVBZ(FM) would not introduce new radio markets and would not affect the definition or total station count of Radio Market "1".

overlapping contours form one "radio market" for analysis under the Commission's rules.

Radio Market "1" is defined by the mutually overlapping principal community contours of WRDU(FM) (as proposed in the accompanying Form 301 application), WDCG(FM), WTRG(FM), WRSN(FM), and WDUR(AM). The predicted principal community contours of these stations (4 FM, 1 AM) are shown in *Figure 1*.

Count of Stations in Defined Markets

The number of radio stations in a "radio market" is determined by counting the operating, commercial stations having principal community contours that overlap or intersect the principal community contours that define the radio market, plus the subject commonly owned or controlled stations.

In Radio Market "1" studied herein, there are at least 15 radio stations, including the subject co-owned stations, that overlap or intersect with the defined "radio market." *Figure 2* is the tabulation of the radio stations identified in the market.

Only known licensed, operating commercial stations were included in this tabulation. Distances to contours for AM stations were predicted using the antenna patterns as identified in the Commission's AM database and the appropriate Ground Wave Field Strength versus Distance Graph of 47 C.F.R. § 73.184. Ground conductivities were obtained from FCC Figure M3. Distances to the FM contours were determined based on the method of 47 C.F.R. § 73.313. Terrain data was derived from the N.G.D.C. 30 second computer database for each of the FM stations using radials spaced every 10 degrees of azimuth.

Based on the above, it is concluded that the proposed modifications comply with § 73.3555(a) of the FCC Rules.

Sincerely,

Nestor Custodio
FCC Processing Administrator
Capstar TX Limited Partnership
