

**Allocation Study**

Below is a listing of the exhibits for the many factors that were taken into consideration in this study.

- Exhibit 15 main –provides an overview of all nearby allocations.
- Exhibit 15-A – shows the relationship between the proposed facility and KARU.C (FIN 124883), which is also owned by EMF. The power for KARU.C has been reduced from 14kw to 0.44kw and the directional antenna has been changed to non-directional (minor modification 20040210AAG) in order to clear the proposed KYLV facility. The new information has been used for this study.
- Exhibit 15B-G – shows the relationship between the proposed facility and the nearby facilities.
- Exhibit 15 part 2 main – a request for a waiver of 47 C.F.R. 73.509 in regard to interference received.
- Exhibit 15 part 2 H-K – shows the relationship between the proposed facility and those facilities for which a waiver has been requested.
