

WITM(AM) at Marion, Virginia (Facility ID # 19478)

Licensee - Bristol Broadcasting Company, Inc.

Application to Modify Licensed Facilities

Figure 2 - Present and Proposed Contour Comparison

The present and proposed contours for WITM(AM) were calculated. With the proposed reduction in power from 5.0 kilowatts to 1.0 kilowatts, all the calculated proposed contours will be completely encompassed by the corresponding equal level current contours. For clarity, only the 5.0 mV/m and the 2.5 mV/m contours were plotted on the chart above.
