

Exhibit 12
FCC Form 349

Specific Interference Analysis

This application complies with interference protection under 47 C.F.R. § 74.1204 as documented below.

Figure 1 demonstrates that the change in location specified in this application is allowable as a minor modification to the original site. There is significant overlap between the original and the currently proposed service areas.

As tabulated below, this proposal is fully spaced under §74.1204(a) with respect to all facilities, permits and applications.

Figure 2 is an allocations study for the facilities which are close enough to warrant study. Height Above Average Terrain is calculated at one degree horizontal increments using data extracted from a 3 arcsecond digital elevation database derived from the USGS National Elevation Dataset 30 meter data. The distance to the relevant contours is calculated and then plotted at the same increments.
