

MINOR CHANGE APPLICATION
NOORDYK BROADCASTING, INC.
WSHN-FM RADIO STATION
CH 261A - 100.0 MHZ - 2.9 KW
HOLTON, MICHIGAN
September 2001

TECHNICAL STATEMENT

This Technical Statement and attached exhibits were prepared on behalf of Noordyk Broadcasting, Inc. (Noordyk), licensee of FM radio station WSHN-FM, Channel 261A, Holton, Michigan. Noordyk herein proposes to make changes to the WSHN-FM facilities by relocating the transmitter site and increasing the effective radiated power to the equivalent of maximum Class A facilities.

Since Noordyk is proposing a new antenna structure, the Federal Aviation Administration has been apprised of this proposal. When a Determination of No Hazard is issued by the FAA, the tower will be registered with the Commission. WSHN-FM does not meet the Commission's minimum distance separation requirements to WBCH-FM. This shortage is due to the change in effective radiated power from 3.0 kilowatts to 6.0 kilowatts for Class A stations. However, WSHN-FM still complies with §73.213(c)(1). See Exhibit A for details.

All exhibits called for on FCC Form 301, Section III-B, are attached hereto. All documentation used to certify the information on the technical portion of Form 301 has been forwarded to the applicant and is available to the Commission upon request.
