Mr. Jim Wooley, Director of Broadcast Services
Campbellsville University
1 University Drive
Campbellsville, KY 42718

Dear Mr. Wooley:

We are in receipt of the survey provided to you for the new WCLU tower site with a facsimile date of October 21, 2010. The survey shows the geographic coordinates of the base of the new tower structure to be 37°20'39.064" N.L. / 85°21'33.708" W.L. based on NAD83 datum.

The FCC Media Bureau employs the NAD27 datum for the purposes of identification of broadcast transmitter sites. For FCC purposes coordinates are rounded to the nearest second.

In this case, I converted the above listed coordinates to NAD27 datum and rounded to the nearest second to obtain the following: 37°20'39 N.L. / 85°21'34" W.L. These coordinates are consistent with the FCC construction permit for WLCU.

Very truly yours,

Louis R. duTreil, Jr., P.E.
