

Exhibit 9
KYYX License to Cover
Construction Permit Condition 1

Pursuant to the condition on the underlying construction permit requiring submission of measurements showing conformance to the spurious emissions requirement of 47 C.F.R. Sections 73.317(b) through 73.317(d), the attached spectrum analyzer photograph is hereby submitted as evidence of compliance. This photograph was taken from the display of a Hewlett Packard spectrum analyzer. The input of the spectrum analyzer was fed the output sample signal from the sampling port of the combining system. All stations utilizing this antenna were operating at licensed power when the photograph was taken. No harmonics or spurious emissions were detected.
