

[Exhibit 13]

Non-Interference Compliance

Regarding Facility id 143311

Channel 223

Description of Exhibit 13 Contents

This exhibit demonstrates that the proposed facility complies with contour overlap and interference protection provisions in all of the applicable rule sections and that this application for a construction permit is in full compliance with 47 C.F.R. § 74.1204.

Let it be noted that should any actual real world interference occur, the applicant acknowledges that it will promptly suspend operation of this translator in accordance with 47 C.F.R. § 74.1203.

Page 2 of this exhibit contains the tabulated data from the interference analysis, which shows all stations whose protected contours come within 50 km of the 34 dBμ F(50,10) contour of the proposed translator. These tabulated values were calculated using data from the FCC's CDBS files and 30 arc second terrain data. The column labeled "Adj" shows the number of channels difference between the entry and the proposed translator. The column labeled "Dist" shows the distance in km. The column labeled "Overlap" shows the area of contour overlap in square kilometers.

Page 3 of this exhibit is a contour map showing the 60 dBμ F(50,50) contour of 1st adjacent fill-in KTAR-FM, Glendale, AZ, FAC# 65479, the 60 dBμ F(50,50) and 54 dBμ F(50,10) of the proposed long form and the location of the primary city of license, Glendale.

Note: As demonstrated in the map on page 3, the interfering 54 dBμ contour of the proposed Long Form does not cause any interference to Glendale, the city of license of KTAR-FM.
