**TECHNICAL STATEMENT**

This Technical Statement was prepared on behalf of Edgewater Broadcasting, Inc. ("EBI"), licensee of FM translator station W230BI, Channel 230D, Metamora, Michigan. EBI has a construction permit (BTFT-20100122ACU) to make minor changes to the W230BI facilities. EBI herein submits a license application to cover the outstanding permit. Attached as Exhibit A is a calculation of the transmitter power output for FM translator W230BI.

There are two special operating conditions/restrictions listed on the W230BI permit. The first condition states, "The permittee/licensee, in coordination with other users of the site must reduce power or cease operation as necessary to protect persons having access to the site, tower or antenna from radio frequency electromagnetic fields in excess of FCC guidelines." The licensee recognizes its obligations under this condition.

The second condition states that "Prior to commencing program test operations, FM Translator or FM Booster permittee must have on file at the Commission, FCC Form 350, Application for an FM Translator or FM Booster Station License, pursuant to 47 C.F.R. Section 74.14." This application satisfies this condition. Based on the foregoing, it is believed all conditions on the W230BI construction permit have been satisfied.
