**ONEONTA, NEW YORK**  
**August 2004**

**TECHNICAL STATEMENT**

This technical statement was prepared on behalf of Banjo Communications Group, Inc. ("BCG"), licensee of FM translator station W232AS, Oneonta, New York. During a recent site review of the tower on which the W232AS antenna system is installed, it was determined the geographic coordinates of the site were at variance with the coordinates listed on the translator license. The W232AS licensed coordinates are North Latitude 42° 27' 27" and West Longitude 75° 04' 40". The coordinates of the actual W232AS site are North Latitude 42° 27' 23" and West Longitude 75° 04' 37". It is noted that this application is for a correction of coordinates only and no actual physical changes to the operating facility are proposed. BCG is proposing to make minor changes/correction to the facilities of W232AS. No actual other changes are proposed. This proposed facility remains a fill-in translator for WKXZ, Channel 230B, Norwich, New York.

The W232AS translator antenna system is mounted on an existing tower. The tower is less than 200 feet above ground and does not require notification/registration.<sup>1</sup> As such, the Federal Aviation Administration ("FAA") was not apprised of this correction of coordinates.

---

1) The tower was reviewed using the Commissions Tow-Air program.

Attached as Exhibit A is a map which shows the proposed translator 54 dBu contour does not extend beyond the 54 dBu contour of WKXZ. Attached as Exhibit B is study demonstrating that the proposed translator will not cause interference to any full service station, nor will interference be delivered to or received from any existing FM translator station or LPFM application.

All exhibits prepared to certify the questions contained this correction application were forwarded to the applicant and are available for submission to the Commission on request.
