

Three Angels Broadcasting Network  
 Dan Peek—Engineer  
 P.O. Box 220  
 West Frankfort, Illinois 62896

August 10, 2009

In evaluating the proposed digital flash cut for K51GL FID 130215, an outgoing interference study was executed on the proposed design in the attached application using the OET-69 Longley Rice methodology. The stations listed in the table below showed possible interference. When these stations were evaluated for outgoing interference, there was zero percent interference present found in each case when rounded to the nearest whole percent.

Three Angels Broadcasting Network requests that the Commission waive the requirement of international coordination with Canada since the proposed 19dBu contour does not cross into Canadian territory.
