In re: Low Power Television Application of:
Central Ohio Association of Christian
Broadcasters, Inc.
Channel 8, Columbus, OH.
File no.: BMPDVA-20090921ABK
Facility Id No.: 66172

Dear Applicant:

On November 3, 2009, the licensee as addressed above was sent a 30 day deficiency letter outlining the following interference issue:

Our preliminary engineering review reveals that your proposed facility does not comply with the Commission's interference rules. Specifically, the proposal is predicted to cause interference to the following facilities:

1. WLIO, Lima, OH. – BMPCDT-20060517ABE

You were given the opportunity to file a minor amendment to resolve the specified interference problem within (30) days from the date of this letter. Amendments must be filed electronically. If not so amended, your application will be considered incomplete and subsequently dismissed.

Our records indicate that an amendment was received on November 9, 2009, for the purpose of resolving the above referenced interference problem. Our preliminary engineering review, including the amendment specifications, reveals that your proposal is still predicted to cause the same interference to the station and construction permit as outlined in the 30 day letter dated November 3, 2009. Therefore, the above referenced construction permit is considered incomplete and IS HEREBY DISMISSED.

Sincerely

Hossein Hashemzadeh
Associate Chief
Video Division
Media Bureau
