

MULTIPLE OWNERSHIP SHOWING

With this application, CBS Radio Annapolis LLC (“CBS Radio”) proposes to acquire FM radio station WLZL(FM) (formerly WFSI(FM)) (the “Station”), Facility Id. No. 20983, Annapolis, Maryland, from Family Stations, Inc.

The acquisition of the Station implicates two of the Commission’s multiple ownership rules: (1) the local radio multiple ownership rule; and (2) the radio-television cross-ownership rule. As demonstrated below, CBS Radio’s acquisition of the Station will comply with the local radio multiple ownership rule and the radio-television cross-ownership rule.

I. Radio Multiple Ownership Study

Section 73.3555(a) of the FCC’s Rules provides that in a radio market with 30 to 44 full-power, commercial and noncommercial radio stations, a single entity may not have a cognizable interest in more than 7 commercial radio stations in total and not more than 4 commercial stations in the same service (AM or FM). The Commission defines the relevant market to be the “Arbitron Metro,” in those markets so designated by Arbitron. *See 2002 Biennial Regulatory Review – Review of the Commission’s Broadcast Ownership Rules and Other Rules Adopted Pursuant to Section 202 of the Telecommunications Act of 1996*, 18 FCC Rcd 13620, 13712-13 (2003).

For purposes of the local radio ownership rule, the Station is deemed to be included in the Baltimore, Maryland Arbitron Metro (the “Metro”). As shown on the attached BIA FCC Geographic Market Definition Report for the Baltimore, MD radio market, there are 36 full-power commercial and noncommercial stations in the Metro. CBS Radio Inc., the indirect parent corporation of CBS Radio Stations Inc., is the direct and indirect owner and operator of the following stations in the Metro:

- WJZ(AM), Baltimore, MD (Facility ID 28636)
- WJZ-FM, Catonsville, MD (Facility ID 1916)
- WLIF(FM), Baltimore, MD (Facility ID 28637)
- WWMX(FM), Baltimore, MD (Facility ID 74196)

Grant of this application will result in the addition of a single FM station to CBS Radio Inc.’s Baltimore market. CBS Radio Inc. would accordingly own and operate one AM station and four FM stations in the Baltimore market. Therefore, the assignment application complies fully with the FCC’s local radio ownership rule.

II. Radio-Television Cross Ownership Study

CBS Radio is an indirect subsidiary of CBS Corporation. CBS Corporation is the parent company of CBS Television Licenses, LLC, licensee of WJZ-TV, Baltimore, Maryland.

The radio-television cross ownership rule, Section 73.3555(c), is triggered in cases where a 60 dB μ (1 mV/m) FM contour or a 2 mV/m AM contour encompasses the entire community of license of a commonly owned TV broadcast station. It is also triggered whenever a TV broadcast station Grade A contour encompasses the entire community of a commonly owned radio station.

Although the FCC Rules are silent regarding digital television service contours with respect to cross ownership, it is understood that the noise-limited DTV service contour (36 dB μ F(50,90)) is temporarily being utilized for this purpose. As shown in Figure 1, the WJZ-TV noise-limited service contour encompasses Annapolis. Further, the WLZL 60 dB μ contour also encompasses Baltimore. Therefore, the cross ownership Rule is triggered by both the WLZL and WJZ-TV contour locations.

CBS Corporation holds an attributable ownership interest in nine other radio stations relevant to this analysis, in addition to WLZL.¹ The principal communities of eight of these radio stations are encompassed by the WJZ-TV noise limited service contour.² Therefore, the radio-television cross ownership rule is triggered for WJZ-TV and the following radio stations.

Baltimore, MD Arbitron Market

- WLZL(FM), Annapolis, MD (Facility ID 20983)
- WJZ(AM), Baltimore, MD (Facility ID 28636)
- WJZ-FM, Catonsville, MD (Facility ID 1916)
- WLIF(FM), Baltimore, MD (Facility ID 28637)
- WWMX(FM), Baltimore, MD (Facility ID 74196)

Washington, DC Arbitron Market

- WNEW(AM), Morningside, MD (Facility ID 28638)
- WIAD(FM), Bethesda, MD (Facility ID 9619)
- WNEW-FM, Bowie, MD (Facility ID 72177)
- WPGC-FM, Morningside, MD (Facility ID 28632)

Under the radio-television cross ownership Rules, the FCC does not count radio stations located in one Arbitron market toward the limits on the number of radio stations a party may own in another Arbitron market, even when the radio stations are within the contour of a commonly owned TV station unless the relevant contour of an out-of-market radio station

¹ CBS Corporation does not have an attributable interest in any television station in the Washington, D.C. market.

² The exception is Manassas, principal community of WJFK-FM, which is not encompassed by the WJZ-TV contour.

triggers the rule. In this instance, the 1 mV/m (60 dB μ) contours of WJFK-FM, WPGC-FM, and WIAD(FM), and the 2 mV/m contour of WNEW(AM) do not encompass all of Baltimore. See Figure 2.

Because the Baltimore and Washington, D.C. radio stations are in two distinct radio markets, there are two separate radio-television markets. In Baltimore, CBS Corporation would have an interest in one television station (WJZ-TV) and six radio stations, including WLZL(FM). In Washington, D.C., CBS Corporation would have an interest in one television station (WJZ-TV) and four radio stations. As shown in Table A, there are at least 20 independently owned media voices in each of the Baltimore and Washington markets. Accordingly, the assignment application complies with the FCC's radio-television cross ownership rule.

In preparing the attached map, pertinent station data were extracted from the Commission's CDBS database. For AM stations, the distances to the 2 mV/m contours were computed using a digitized version of the Commission's estimated soil conductivity map, Figure M-3 and a computer program that simulates the Commission's AM groundwave propagation curves. For the FM stations, distances to the 1 mV/m (60 dB μ) contours were determined using digitized 3 arc-second terrain data along radials spaced every degree from the transmitter site and an implementation of the Commission's TVFMFS computer program which simulates the FM propagation curves. A GIS mapping program was utilized to plot the principal community contour locations and generate the attached maps.
