Mr. Faron Eckelberger  
World Radio Link  
PO Box 5428  
Twin Falls, ID 83303

Dear Faron,

Using the Telewave M105-100-3TRSP diplexer (with >70 dB port-to-port isolation) and three of our FMX-300B FM exciters on frequencies of 91.1 MHz (185W TPO) , 97.3 MHz (185W TPO) and 107.1 MHz (185W TPO), the inter-modulation products would be less than -74 dB below carrier. This would be well below the FCC requirements for out of band emissions.

Please contact me if you have any additional question.

Best Regards,

Sinan Mimaroglu  
General Manager  
Armstrong Transmitter Corporation
