

### **Propose of Amendment**

This amendment proposes change to the following 349 application sections:

1. Section III-A, Item 4:       Coordinates
2. Section III-A, Item 5:       Antenna Structure Registration
3. Section III-A, Item 6:       Ground Elevation
4. Section III-A, Item 7:       Overall Tower Height
5. Section III-A, Item 8:       Center of Radiation Above Ground Level
6. Section III-A, Item 9:       Effective Radiated Power
7. Section III-A, Item 10:      Transmit Antenna

Also, this amendment is to change the proposed transmitter site of the translator. The change is a minor change as the current authorized facilities and those sought in this amendment share coverage areas in common. Thus, the request for the Mattoon waiver in the application being hereby amended is no longer necessary.
