

I, Gale Gilbreath, Chief Engineer of Cumulus Broadcasting of Florence, SC do hereby certify the following:

That I have been a holder of an F.C.C. Radio-Telephone License since 1981 and have been actively engaged in broadcast engineering since that time. Also have been responsible for the construction of several transmitter facilities.

I referenced a set of mounting instructions provided by Dielectric, the antenna manufacturer and supervised the installation for WFSF, Marion, SC, F.C.C. File Number BPH-20010807AAJ. A detailed inspection determined that the antenna was installed exactly according to the manufacturer's instructions. In addition, I inspected the installations to verify the following: 1) that no platforms on the structure are larger than the nominal cross sectional area of the tower in the antenna horizontal plane, 2) no additional antennae are located within the area of the antenna, vertical or horizontal, and 3) the tower and all cables, steps etc., are properly grounded.

Upon a complete and thorough examination, I can conclude that the directional antenna has been installed exactly as specified by the mounting instructions from Dielectric

A handwritten signature in black ink, appearing to read "Gale Gilbreath", written over a horizontal line.

*Chief Engineer*
