Re: Larlen Communications, Inc.
WXPZ(FM), Clyde Township, Michigan
Facility Identification Number: 121239
Special Temporary Authority

Dear Ms. Harp:

This is in reference to the request filed July 30, 2010, on behalf of Larlen Communications, Inc. ("LCI"). LCI requests special temporary authority ("STA") to operate Station WXPZ with temporary facilities.¹ In support of the request, LCI states that it has been unable to negotiate a lease agreement at the current site, that the station currently is silent and must return to the air by August 16, 2010, to avoid loss of its license.² LCI requests STA for operation with temporary facilities pending the filing of an application for construction permit for permanent relocation of the station.

STA requests which involve a change in transmitter site must include four critical elements: (1) Loss of the licensed site must be beyond the licensee's control; (2) STA facilities must continue to provide service³ to the licensed community; (3) STA facilities must maintain, as closely as practicable, the licensed service area⁴ without extending it; (4) STA facilities cannot involve the construction of towers intended for permanent use by the station requesting the STA. Our review indicates that the proposed STA operation complies with the foregoing criteria.

Accordingly, the request for STA IS HEREBY GRANTED. Station WXPZ may operate with the following facilities:

Geographic coordinates:	42° 31' 49" N, 86° 09' 02" W (NAD 1927)
Channel	211 (90.1 MHz)
Effective radiated power:	Not to exceed 0.7 kilowatt (H&V)
Antenna supporting structure:	Existing farm silo
Antenna height:	
above ground:	39 meters
above mean sea level:	231 meters
Above average terrain:	35 meters

¹ WXPZ is licensed for operation on Channel 211A (90.1 MHz) with effective radiated power of 0.02 kilowatt (H), 1.5 kW (V) (Max-DA) and antenna height above average terrain of 74 meters.

² The original STA request was supplemented by e-mail on August 2, 2010.

³ For AM - 5 mV/m; for commercial FM - 3.16 mV/m; for noncommercial educational FM - 1.0 mV/m.

⁴ For AM - 0.5 mV/m contour; for FM - 1.0 mV/m contour.

LCI must notify the Commission when licensed operation is restored. LCI must use whatever means are necessary to protect workers and the public from exposure to radio frequency radiation in excess of the Commission's exposure guidelines. *See* 47 CFR § 1.1310.

This authority expires on **February 3, 2011**.

Notwithstanding the grant of this STA or the expiration date specified herein, the station's license will expire as a matter of law upon twelve consecutive months of silence. *See* Pub. Law No. 104-104, 110 Stat. 56, Section 403(1) (1996) and *Order, Silent Station Authorizations*, FCC 96-218 (released May 17, 1996). *See also Public Notice*, Expedited Processing of Applications Filed by Silent Stations, DA 96-818 (May 22, 1996). The licensee must notify the Audio Division immediately upon resumption of broadcasting.

STA Advisory: Section 309(f) of the Communications Act of 1934, as amended, authorizes the Commission to grant STA in cases of "extraordinary circumstances requiring temporary authorizations in the public interest and when delay in the institution of the temporary operations would seriously prejudice the public interest." However, Section 309(f) is not a means by which a licensee/permittee may circumvent established processing procedures which require the filing of an application, nor is it a means by which a broadcaster may enhance his facility or make operation more convenient for the broadcaster. Stations operating with less than licensed facilities under temporary authorities can be viewed as receiving the benefit of a larger protection area than that in which they are currently providing service.

Accordingly, Special Temporary Authorities by nature are to be temporary and are not intended for extended use. Licensees of stations operating under temporary authorities are reminded that timely restoration of permanent facilities is the responsibility of the licensee and should be undertaken expeditiously. Any request for extension of special temporary authorities carries an increased burden with each subsequent request.

Therefore, requests for extension of STA will be granted only where the licensee can show that one or more of the following criteria have been met:

- Restoration of licensed facilities is complete and testing is underway;
- Substantial progress has been made during the most recent STA period toward restoration of licensed operation; or
- No progress has been made during the most recent STA period for reasons clearly beyond the licensee's control, and the licensee has taken all possible steps to expeditiously resolve the problem.

Sincerely,

Charles N. Miller, Engineer
Audio Division
Media Bureau
