In evaluating the proposed conversion to digital for W26BE, FID 72218, an outgoing interference study was executed. It was discovered that according to Longly-Rice methods approved by the OET, that WATE-DT FID 71082 would receive lethal interference if WJNK-LP were to continue operation on channel 26. After thorough searching, channel 18(T) was found to cause no lethal levels of interference to other stations. Thus, Three Angels Broadcasting Network respectfully requests that the Commission look favorably on this application.
