To Whom It May Concern:

Re: Installation of Directional Antenna for WWSP (FM), Stevens Point, WI: Affidavit of Azimuth

This letter is in response to Section 73.316 of the FCC Rules, which requires, in the case of installation of a directional antenna for an FM broadcast station, a statement from a licensed surveyor that the antenna has been oriented at the proper azimuth.

I, Thomas J. Trzinski, am a Registered Land Surveyor in the State of Wisconsin, employed at Lampert Lee & Associates.

On September 15, 2006 our firm surveyed the WWSP tower, to document the tower face mount azimuths. Based on that survey I confirm the antenna mounted tower face to be at two hundred and sixteen (216) degree True North as represented in the antenna manufactures studies.

I do hereby certify that on Wednesday, May 21, 2008, using a survey instrument with accuracy of +/- 0.1 deg., verified that the five bay antenna array was installed and oriented to an azimuth of, two hundred and sixteen (216) degree True North, pursuant to the manufacture's instructions.

Signed   
 Thomas J. Trzinski, RLS-2636
