

**ENGINEERING TECHNICAL STATEMENT PREPARED BY WILLIAM T. GODFREY OF THE FIRM KESSLER AND GEHMAN ASSOCIATES, INC., TELECOMMUNICATIONS CONSULTING ENGINEERS IN CONNECTION WITH A DISPLACEMENT RELIEF APPLICATION FOR AUTHORITY TO MAKE CHANGES IN A CLASS A TELEVISION BROADCAST STATION (FCC FORM 301-CA).**

The firm Kessler and Gehman Associates, Inc., has been retained by the Citrus County Association for Retarded Citizens (CCARC), Inc., Inverness, Florida in order to prepare engineering studies and the engineering portion of the displacement relief application for authority to make changes in a Class A television broadcast station (FCC Form 301-CA). The CCARC is licensed to operate WYKE-LP on UHF, analog Channel 49 (no offset) with an ERP of 19.5 kW (horizontal) at an antenna height radiation center of 87.0 meters above average terrain in the vicinity of Crystal River, FL. The CCARC also has a construction permit ("CP") to build WYKE-LP on UHF, analog Channel 48 (zero offset) with an ERP of 20.2kW (horizontal) at an antenna height R/C of 87.0 meters AAT in the vicinity of Crystal River, FL. Please be advised that the CCARC does not plan to build the Channel 48 CP due to the fact that it will also be displaced by a DTV station. Therefore, the CH 48 CP should be dropped.

The CCARC submitted a Channel 26+ displacement relief application simultaneously with a Class A application on January 16, 2001. Since then, WYKE has been granted Class A status and the Channel 26+ displacement application has been granted a construction permit. Unfortunately, it has been discovered that the azimuth pattern submitted in the CH 26+ displacement application was rotated approximately 230° more than desired and **it has also been discovered that the Channel 26+ Class A station is predicted to receive 3% interference from the WVEN-TV Channel 26 (co-channel) Daytona Beach CP facility.** Therefore, not only would the WYKE-CA CH 26+ facility lose a significant service population due to the fact that the main beam would be oriented over the ocean at 248° rather than over the desired area of interest at 060°, they would also experience an additional 3% reduction to their service population from the interference predicted to be received from the WVEN co-channel facility. The main beam cannot simply be rotated to the desired orientation because it would result in unacceptable interference to the WVEN-TV facility. As you can see from Exhibit 14, the WYKE Channel 26+ CP facility would take a direct hit to a key service area where it is predicted that interference to 3% of its entire service population would take place. Exhibit 15 depicts the predicted interference tabulation and reveals that 1,114 people, out of a total service population of only 37,415 people within the entire WYKE service area, would receive interference. Conversely, Exhibits 15 and16 demonstrate that the proposed WYKE-CA CH 47+ Class A facility would receive a total of only 1.0% interference from all surrounding stations. Furthermore, the azimuth pattern main beam overshoot would be corrected such that the main beam would no longer be oriented over the Gulf of Mexico and the contour overlap between the WYKE-CA CH 26+ CP and the Live Oak, FL CH 26+ application (BNPTTL20000817AAW) would be completely eliminated.

Initially, we performed studies to prepare a Class A application for WYKE and we determined that the licensed WYKE-LP Channel 49 facility would be displaced when the WVEN-DT (formerly WNTO-DT) facility went digital. We also determined that the WYKE-LP Channel 48 Construction Permit would be displaced when WOPX-DT and WFXU-DT constructed their digital stations. We performed interference studies ranging from in-core channels 2 through 51 and determined that the best channel available at the licensed site location is analog channel 47+. The proposed CH 47+ facility would not have its site within the protected contour of a co-channel or first adjacent channel TV broadcast station but the ratio in dB of its field strength to that of the WTEV-TV CH 47- broadcast station at the protected contour fails to meet the requirements specified in §74.705 of the FCC Rules. Therefore, as depicted in §74.705 of the FCC

Rules, we are requesting a waiver of the interference protection rules. Terrain shielding and Longley-Rice terrain dependent propagation prediction methods demonstrated that the proposed facility would not cause unacceptable interference to the WTEV-TV CH 47- broadcast station, or any other station for that matter (See Exhibit 13).

Exhibit 12 is a LPTV study which identifies all stations that the proposed WYKE-CA CH 47+ facility would be short-spaced with. As you can see, the study results established that the proposed WYKE-CA CH 47+ facility would be short-spaced with the WFTT-DT CP CH 47 and the WTEV-TV CH 47 facilities. Obviously, the WYKE-LP CH 48 short-spacing is not applicable. Since it was determined that short-spacing did exist, we performed a Longley-Rice study using a Sun Microsystems SPARC 5 computer work station loaded with the FCC's TV Interference and Spacing Analysis software (See Exhibit 13).

Exhibit 13 depicts the detailed Longley-Rice interference studies. As you can see, the proposed WYKE-CA Channel 47+ does not cause more than 0.5% interference to any station. The Low Power TV Study indicated that short-spacings existed with WFTT-DT and WTEV-TV. Apparently, at some point in time WBHS changed call signs to WFTT and as a result, the Low Power TV Studies reflect the WFTT call sign and the Longley-Rice studies reflect the WBHS call sign. This is not a problem though because the true parameters are used regardless of call sign. As you can see by viewing the Longley-Rice studies exhibit, the proposed WYKE-CA is predicted to cause only 0.5% interference to WBHS (WFTT). The FCC Rules state that Class A station interference cannot decrease population in the DTV service area by more than 0.5%, therefore, the proposed WYKE-CA Channel 47+ facility complies with the Class A protection to DTV Rules with respect to WBHS (WFTT).

The Low Power TV Study also indicated that the proposed WYKE-CA CH 47+ facility would be short-spaced with WTEV-TV. Again, referring to the Longley-Rice exhibits, you can see that proposed WYKE-CA CH 47+ facility is predicted to cause 0.0% interference to the licensed WTEV-TV facility. Therefore, in accordance with the FCC's alternate protection means using terrain shielding and Longley-Rice, the proposed WYKE-CA CH 47+ facility complies with the NTSC TV protection from Class A TV rules.

The FCC Form 301-CA Certification section requires the following: 1) Exhibit 4 explanation of Analog TV broadcast station protection; 2) Exhibit 5 explanation of Digital TV station and DTV Table of Allotments protection; 3) Exhibit 6 explanation of Low Power TV, TV translator, Class A, and Digital Class A station protection; 4) Exhibit 7 explanation of Land mobile station protection; and 5) Exhibit 8 explanation of Environmental Protection Act. The Longley-Rice studies (Exhibit 13) address the aforementioned exhibits 4 through 6 and 8. This engineering technical statement along with Exhibit 17 addresses the aforementioned Exhibit 7 (Land Mobile Protection). This engineering technical statement addresses the aforementioned Exhibit 8 (Environmental Protection Act).

Exhibit 18 is dedicated for the "Land mobile station protection" as per 47 C.F.R. §73.6020. Refer to Exhibit 18 for the Land Mobile Control Transmitter Locations. As you can see, the closest transmitter location to the proposed WYKE-CA Channel 47+ is in Miami, FL, which is approximately 414.9 km away. Therefore, the proposed WYKE-CA Channel 47+ does not cause interference to any applicable Land Mobile stations.

## **Attached Figures**

The following list is an index of enclosed figures produced by calculations and engineering studies of the proposed WYKE-CA Channel 47+.

- 1) Exhibit 1 – Engineering Specifications
- 2) Exhibit 2 – Antenna Data
- 3) Exhibit 3 – Elevation View (Tower Drawing)
- 4) Exhibit 4 – Azimuth Pattern
- 5) Exhibit 5 – Azimuth Pattern Tabulation
- 6) Exhibit 6 – Elevation Pattern
- 7) Exhibit 7 – Elevation Pattern Tabulation
- 8) Exhibit 8 – ERP/dBk Pattern
- 9) Exhibit 9 – ERP/dBk Pattern Tabulation
- 10) Exhibit 10 – Site Plotted on Top Map
- 11) Exhibit 11 – FCC Service Contour Plotted for WYKE-CA CH 47+
- 12) Exhibit 12 – Low Power TV Studies
- 13) Exhibit 13 – Longley-Rice Interference Studies (WYKE-CA Channel 47+ Interference Studies (Pertains to Exhibits 4 – 6 in FCC Form 301-CA / Exhibits 1 -3 in Form 301-CA are not applicable for engineering).
- 14) Exhibit 14 – WYKE-CA CH 26+ Interference Study (to show interference received)
- 15) Exhibit 15 – WYKE-CA CH 26+ Interference Study Tabulation (to show 3.0% interference received)
- 16) Exhibit 16 – WYKE-CA CH 47+ Interference Study (to show interference received)
- 17) Exhibit 17 – WYKE-CA CH 47+ Interference Study Tabulation (to show interference received)
- 18) Exhibit 18 – Land mobile station protection

## **Environmental Impact**

The proposed construction will have no significant environmental impact as defined in §1.1307 of the FCC Rules. The transmitter, transmission line and antenna system will produce an ERP of 50.0 kW. Assuming that the maximum lobe of radiation is oriented at the base of the tower for WYKE-CA, it will produce a power density six feet above the ground of  $0.097\text{mW/cm}^2$ . This is only 4.34% of the maximum permissible exposure (MPE) authorized by the American National Standards Institute (ANSI). Since the proposed operation of WYKE-CA Channel 47+ would not exceed 5.0% of the MPE limit for population/uncontrolled at any point on the ground, WYKE-CA would not be considered a “significant contributor” to the RF exposure environment pursuant to OET Bulletin 65, Edition 97-01. Therefore, contributions of exposure from other sources were not accounted for in this analysis. It is safe to conclude that the emissions will be insignificant and well within the maximum allowable requirements. If other antennas are placed on the tower in the future, the applicant will cooperate with those users by reducing or completely terminating the power to the antenna when maintenance workers are in danger from the electromagnetic radiation emanating from the antenna. The tower will be enclosed within a fence with warning signs posted at the locked gate.

## **Certification**

The applicant accepts full responsibility for the elimination of any objectionable interference including that caused by intermodulation to facilities in existence or authorized prior to the grant of this application.

This technical statement was prepared by William T. Godfrey, Telecommunications Consultant with Kessler and Gehman Associates, Inc. having offices in Gainesville, Florida and has been working in the field of radio and television broadcast consulting since 1998. He graduated from the University of North Florida with a Bachelor of Arts degree in Criminal Justice and a minor in Mathematics and received a Commission in the Aviation Branch of the United States Army in 1993. As a Professional in the field of Telecommunications and as a Captain in the United States Army, he states under penalty of perjury that the information contained in this report is true and correct to the best of his knowledge and belief.

KESSLER AND GEHMAN ASSOCIATES, INC.

A handwritten signature in blue ink that reads "William T. Godfrey". It is written in a cursive style with some loops and flourishes. A solid horizontal line is drawn beneath the signature.

## **Kessler and Gehman Associates, Inc. Population Report**

WYKE-CA (26+) Inglis-Yankeetown, FL

TV Incoming Interference Study

Signal Resolution: 2 km

Consider NTSC Taboo: Yes

KWX error points are considered to be interference free coverage.

# of radials computed for contours: 36

Contours calculated using 8 radial HAAT.

LR Profile Spacing Increment: 1.0 km

Interference considered within the reference station's 74 dBu FCC contour.

Using NTSC LPTV/Translators D/U rules.

Threshold for reception: 74.0

Study Date: 6/14/2002

TV Database Date: 06-14-02

Population Database: 1990 US Census

Percentages calculated using a baseline population of 37,415.

### **Stations which cause interference:**

Call Letters	H Units	Population	%	Area (sq. km)
WVENTV (26Z)	478	1114	2.977	8.54

### **Masking Summary:**

Call Letters	Total Interference		Unique Interference	
	Population	%	Population	%
WVENTV (26Z)	1114	2.977	1114	2.977

---

Call Letters	City	State	Dist	Bear
WZVNTV (26-)	Naples	FL	286.4	161.8
WVENTV (26Z)	Daytona Beach	FL	110.0	65.7

---

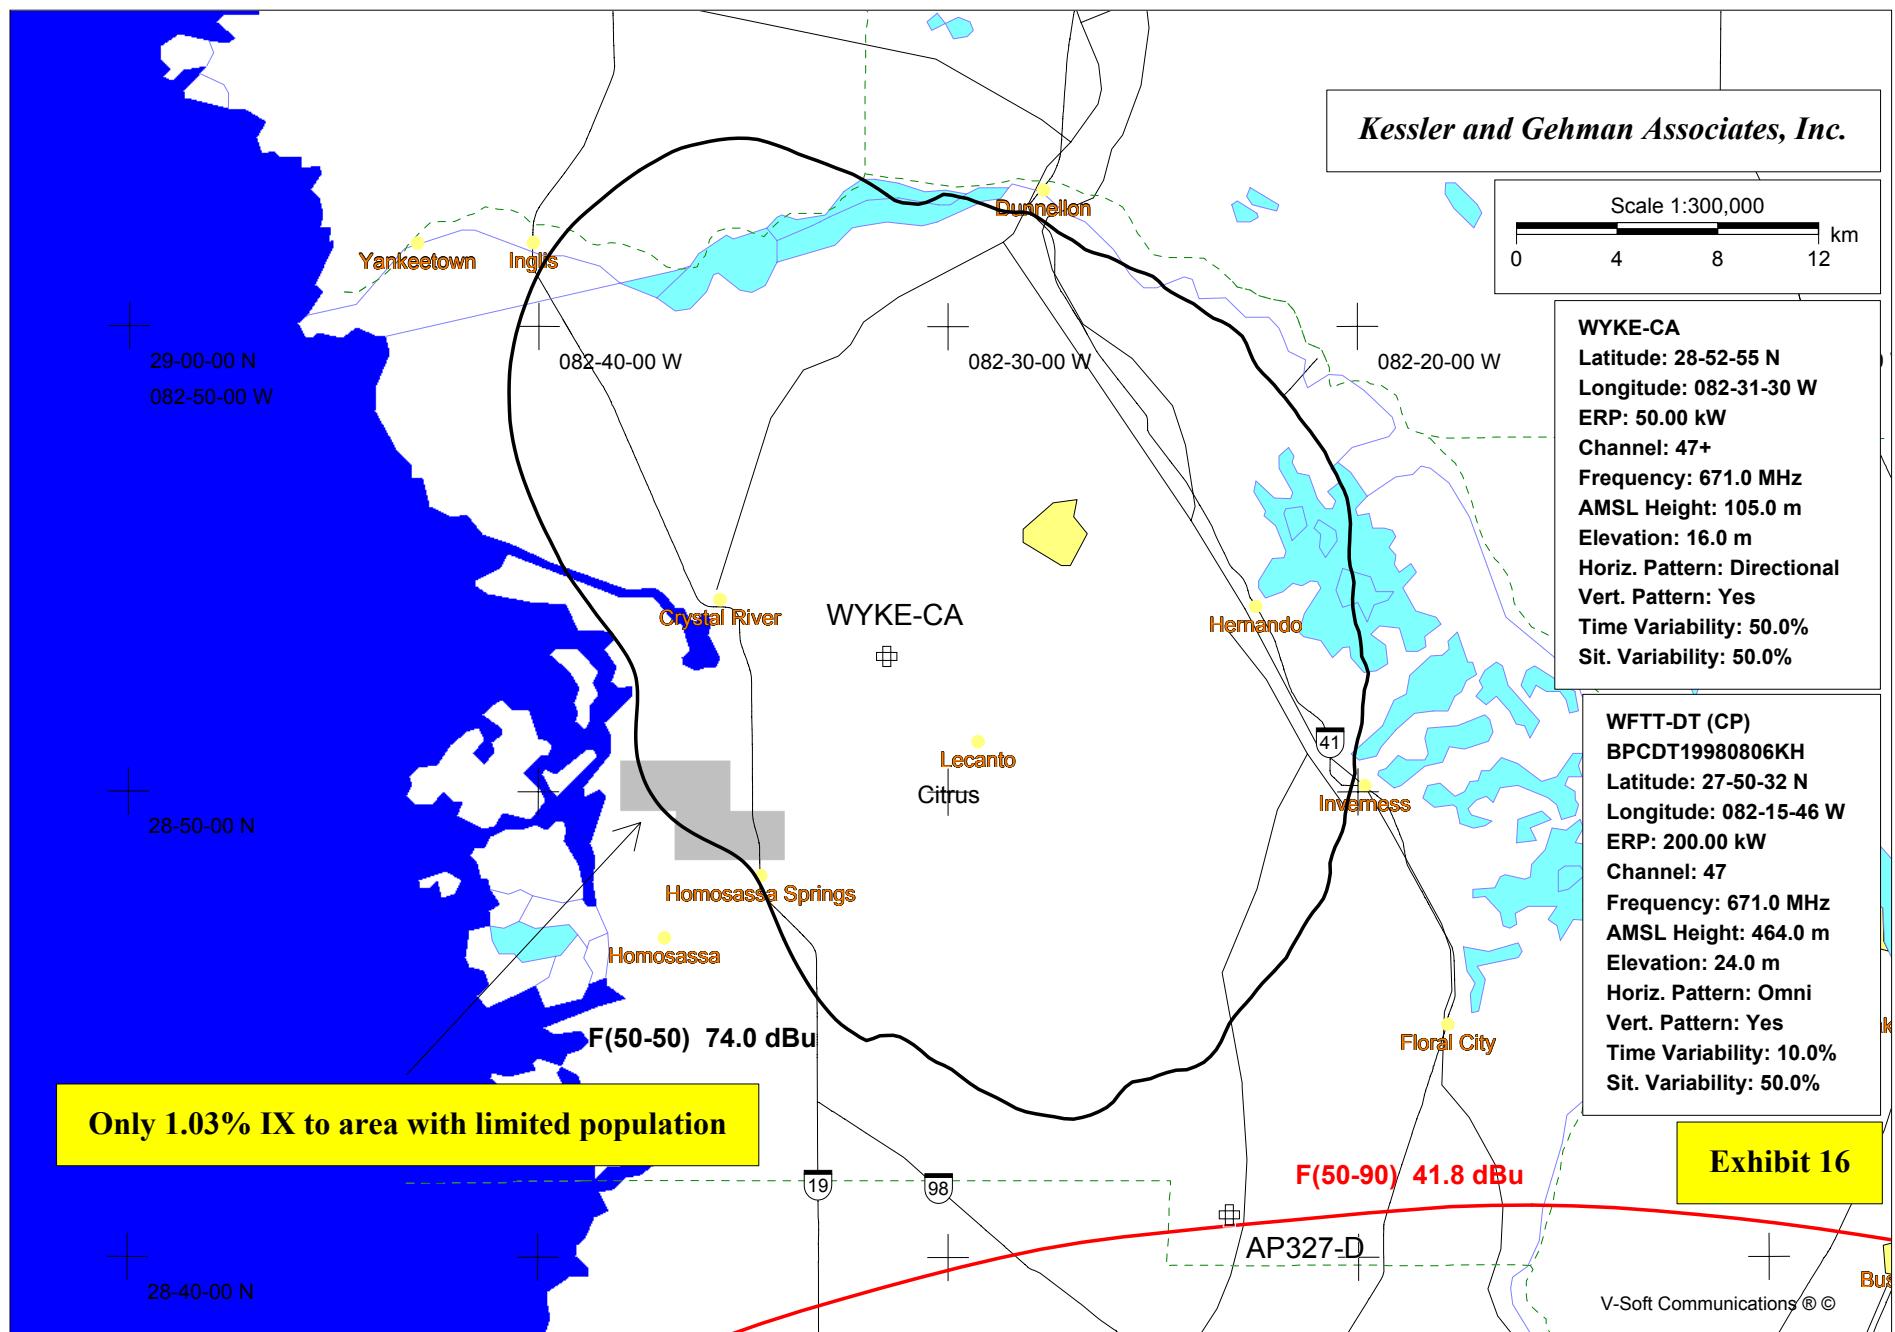

### **Totals for WYKE-CA (26+)**

Calculation Area Population:	37,957 (666.4 sq. km)
Not Affected by Terrain Loss:	37,957 (666.4 sq. km)
Total NTSC Interference:	1,114 (- 8.5 sq. km)
DTV Only Interference:	0 (- 0.0 sq. km)
Total DTV Interference:	0 (- 0.0 sq. km)

**Interfered Population:** 1,114 ( 8.5 sq. km)  
**Interference Free:** 36,843 (657.9 sq. km)

**Percent Interference:** 2.98

**Terrain Blocked Population:** 0 (0.0 sq. km)  
**Contour Area Population:** 37,415

## **Kessler and Gehman Associates, Inc. Population Report**

WYKE-L (47+) Inglis/Yankeetown, FL

TV Incoming Interference Study

Signal Resolution: 2 km

Consider NTSC Taboo: Yes

KWX error points are considered to be interference free coverage.

# of radials computed for contours: 36

Contours calculated using 8 radial HAAT.

LR Profile Spacing Increment: 1.0 km

Interference considered within the reference station's 74 dBu FCC contour.

Using NTSC LPTV/Translators D/U rules.

Threshold for reception: 74.0

Study Date: 6/14/2002

TV Database Date: 06-14-02

Population Database: 1990 US Census

Percentages calculated using a baseline population of 62,406.

### **Stations which cause interference:**

Call Letters	H Units	Population	%	Area (sq. km)
WFTT-D.C (47)	419	643	1.030	17.09
WBHSTV-D.R (47)	97	158	0.253	12.82

### **Masking Summary:**

Call Letters	Total Interference		Unique Interference	
	Population	%	Population	%
WFTT-D.C (47)	643	1.030	485	0.777
WBHSTV-D.R (47)	158	0.253	0	0.000

Stations considered which do not cause interference:

AP327-D (39-)  
WTEVTW (47-)  
AP484 (61+)  
WVEATV.C (62Z)  
WLGBTW-D.R (46)

---

Call Letters	City	State	Dist	Bear
AP327-D (39-)	Crystal River	FL	26.0	148.5
WTEVTW (47-)	Jacksonville	FL	180.3	30.8

WFTT-D.C (47)	Tampa	FL	118.1	167.4
AP484 (61+)	Gainesville	FL	83.0	356.8
WVEATV.C (62Z)	Venice	FL	120.6	167.5
WLCBTW-D.R (46)	Leesburg	FL	73.3	91.7
WBHSTV-D.R (47)	Tampa	FL	118.1	167.4

### **Totals for WYKE-L (47+)**

**Calculation Area Population:** **60,646 (905.3 sq. km)**  
**Not Affected by Terrain Loss:** **60,646 (905.3 sq. km)**  
**Total NTSC Interference:** **0 ( 0.0 sq. km)**  
**DTV Only Interference:** **643 ( 17.1 sq. km)**  
**Total DTV Interference:** **643 ( 17.1 sq. km)**  
**Interfered Population:** **643 ( 17.1 sq. km)**  
**Interference Free:** **60,003 (888.3 sq. km)**

**Percent Interference:** **1.03**

**Terrain Blocked Population:** **0 (0.0 sq. km)**  
**Contour Area Population:** **62,406**

PART 22--PUBLIC MOBILE SERVICES--Table of Contents

Subpart E--Paging and Radiotelephone Service

Sec. 22.625 Transmitter locations.

This section governs where point-to-multipoint transmitters on the channels listed in Sec. 22.621 may be located.

(a) 928-960 MHz. In this frequency range, the required minimum distance separation between co-channel fixed transmitters is 113 kilometers (70 miles). However, this requirement may be waived if the applicant submits an engineering analysis that shows that no interference would be caused to either system. In such a case, a developmental authorization may be issued (see Sec. 22.415). If no interference is experienced during the term of the developmental authorization, the licensee may apply for a regular authorization.

(b) 470-512 MHz. The purpose of the rule in paragraph (b)(1) of this section is to define the areas in which the 470-512 MHz channels are allocated for public mobile use. The purpose of the rules in paragraphs (b)(2) and (b)(3) of this section is to reduce the likelihood that interference to television reception from public mobile operations on these channels will occur.

(1) Control transmitter locations. Control transmitter locations must be within 80 kilometers (50 miles) of the designated locations in this paragraph.

Urban area	N. latitude	W. longitude
Boston, MA.....	$42^{\circ}21'24.4''$	$71^{\circ}03'22.2''$
Chicago, IL.....	$41^{\circ}52'28.1''$	$87^{\circ}38'22.2''$
Cleveland, OH.....	$41^{\circ}29'51.2''$	$81^{\circ}41'49.5''$
Dallas, TX.....	$32^{\circ}47'09.5''$	$96^{\circ}47'38.0''$
Detroit, MI.....	$42^{\circ}19'48.1''$	$83^{\circ}02'56.7''$
Houston, TX.....	$29^{\circ}45'26.8''$	$95^{\circ}21'37.8''$
Los Angeles, CA.....	$34^{\circ}03'15.0''$	$18^{\circ}14'31.3''$
Miami, FL.....	$25^{\circ}46'38.6''$	$80^{\circ}11'31.2''$
