PHONE: 706-518-3911

To Whom It May Concern:

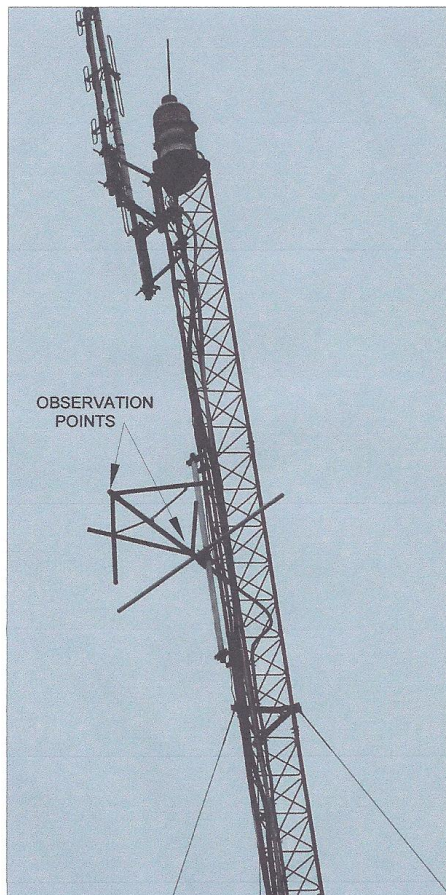

On December 19, 2012, I Tindell F. Adams, visited the site at 508 Auburn Avenue, Andalusia Alabama. I calculated the azimuth of the antenna, as shown below (picture), from a base line established by a C.O.R.S. GPS observation together with a conventional total station. The basis of bearing for the antenna by this method is NAD 83, Alabama East Zone State Plan Coordinate System. The antenna azimuth is 35°13'.

Thank you,

Tindell F. Adams, PLS
