

TECHNICAL STATEMENT  
RADIO MULTIPLE OWNERSHIP ANALYSIS  
CLEAR CHANNEL BROADCASTING LICENSES, INC.

This statement and the attached figures were prepared on behalf of Clear Channel Broadcasting Licenses, Inc. ("CCBL"), a subsidiary of Clear Channel Communications, Inc. ("Clear Channel"). CCBL proposes to purchase of WRNO-FM. A multiple ownership analysis was prepared considering the following radio stations under present or proposed common ownership or time brokerage:

Call Sign	State	City	Freq	ERP_w	Class	Status
WYLD	LA	NEW ORLEANS	940 kHz	10000	B	LIC
WODT	LA	NEW ORLEANS	1280	5000.0	B	LIC
WQUE-FM	LA	NEW ORLEANS	93.3	100000	C	LIC
WYLD	LA	NEW ORLEANS	98.5	100000	C	LIC
WRNO	LA	NEW ORLEANS	99.5	100000	C	LIC
WNOE	LA	NEW ORLEANS	101.1	100000.0	C	LIC
KFXN	LA	HOUMA	104.1	100000	C	LIC

Since certain of these stations have overlapping principal community contours (5 mV/m for AM stations, 3.16 mV/m for FM stations), an ownership study has been prepared in accordance with the Federal Communications Commission's multiple ownership rules<sup>1</sup>.

Clear Channel does not have an attributable interest in any other station with a principal community contour that overlaps WRNO-FM.

Radio Markets

The "radio market" applicable to common ownership of the subject stations is defined as the area encompassed by the mutually overlapping principal community contours of the proposed commonly owned stations. The predicted principal community contours of WODT, WYLD, WQUE-FM, WYLD-FM, WRNO-FM, WNOE-FM and KFXN-FM are shown in *Figure 1* attached. Examination of *Figure 1* reveals that the mutually overlapping contours form one "radio market" for analysis under the Commission's rules.

---

<sup>1</sup> See 47 C.F.R. Section 73.3555.

The radio market is defined by the mutually overlapping principal community contours of WODT, WYLD, WQUE-FM, WYLD-FM, WRNO-FM, WNOE-FM and KFXN-FM

Count of Stations in Defined Market

The number of radio stations in a “radio market” is determined by counting the operating, commercial stations having principal community contours which overlap or intersect the principal community contours which define the radio market, plus the subject commonly owned or controlled stations.

In the radio market studied herein, there are at least 69 radio stations, including the subject co-owned stations, that overlap or intersect with the defined “radio market.”

*Figure 2* is the tabulation of the other radio stations identified in the defined radio market. Only known licensed, operating commercial stations were included in this tabulation. Distances to contours for AM stations were predicted using the antenna patterns as identified in the Commission’s AM database and the appropriate Ground Wave Field Strength versus Distance Graph of 47 C.F.R. Section 73.184. Ground conductivities were obtained from FCC Figure M3. Distances to the FM contours were determined based on the method of 47 C.F.R. Section 73.313. Terrain data was derived from the N.G.D.C. 30 second computer database for each of the FM stations using radials spaced every 10 degrees of azimuth.

Based on the above, it is concluded that the proposed modifications comply with Section &3.3555(a) of the FCC Rules.

Sincerely,

Troy G. Langham  
FCC Specialist  
Clear Channel Broadcasting Licenses, Inc.
