

Exhibit 19 - WKVP CH6 Waiver

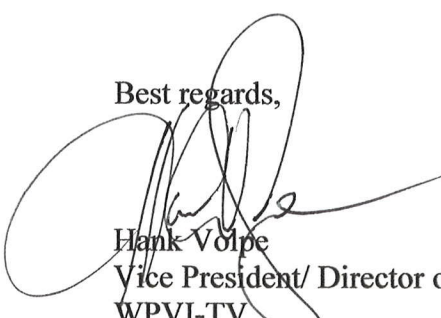

March 30, 2010  
Mr. Peter Fretwell  
WWFM P.O. Box B  
Trenton, NJ 08690 - U.S.A.

Peter:

WPVI-TV in Philadelphia has had the opportunity to review the technical parameters for your proposed modifications to WKVP. Our analysis shows there should actually be a reduction in interference to us with the proposal if the antenna is installed correctly. We are happy to grant approval for the project to proceed provided that we receive confirmation after installation that the antenna was properly installed in the form of a report. This is simply a surveyor's site report and photos that the feed points are on the antenna match marks.

If for some reason the technical parameters have to be amended or modified after filing, WPVI-TV requires that we have the opportunity to review those changes before the FCC grants your request.

Best regards,

  
Hank Volpe  
Vice President/ Director of Engineering  
WPVI-TV
